Summary

- Experienced in delivering B2B/B2C SaaS web and mobile applications in Agile environments
 - Skilled in eliciting and translating requirements into functional specs, process flows and user stories
 - Proficient in stakeholder communication and cross-functional collaboration across the SDLC
 - Strong technical foundation across UX/UI, APIs, databases, QA processes and AWS services
-

Skills

- **Business Analysis/Requirements** - SDLC, Agile (Scrum), Waterfall, Cross-Functional Collaboration, Stakeholder Communication, Requirements Elicitation & Analysis, BRD/FRD Documentation, Functional Specifications, Process Mapping, Gap Analysis, Use Cases, User Stories & Acceptance Criteria, Backlogs, Sprint & Release Planning, Process Improvement
 - **Technical** - UX/UI, REST APIs, API Integrations, SQL/NoSQL Databases, Data Validation, System Integration, Scalability & Performance Optimization, QA Process, QA Strategy, UAT Coordination
 - **Tools/Platforms** - Jira, Confluence, Postman, Git/GitHub/Bitbucket, SQL Clients, Docker, AWS (EC2, S3, RDS, DynamoDB, ELB, Auto Scaling etc.), ChatGPT, Gemini
-

Experience

Product Manager (Founder) – Colorido7 Software

Jan 2019 – Nov 2025, Bengaluru, Karnataka, India

Worked in multiple cross-functional roles with a primary focus on product and technology, driving end-to-end development of platforms such as Mediniz and Chirkoot. Scaled Mediniz to 800+ subscribed doctors, 26K+ appointments and 2K+ articles by doctors; scaled Chirkoot to 1400+ learners and 9K+ practice completions.

- Defined product vision, roadmap and feature prioritization strategically aligned with business goals
- Elicited and translated requirements into functional specifications, user stories and acceptance criteria
- Conducted stakeholder discussions, user interviews and feedback analysis to refine feature scope
- Managed backlog refinement, sprint planning and release coordination in Agile (Scrum) environments
- Collaborated with engineering team on APIs, database design and workflows to ensure feasibility
- Oversaw UX improvements and increased user engagement, usability and overall user satisfaction
- Led UAT cycles, defect validation and release sign-offs to ensure requirement traceability and quality

Level III QA Analyst – Globalscape Inc (Fortra)

Sep 2013 - Aug 2018, San Antonio, Texas, USA (On-site)

Globalscape is a global leader in Managed File Transfer (MFT) solutions, serving thousands of enterprise clients. Worked on flagship products including EFT, Arcus and WTC.

- Led offshore QA and managed full-cycle manual and automated testing for enterprise MFT products
- Drove requirement analysis, test planning, test case design and end-to-end test execution across releases
- Collaborated with product, PM, development and support teams to ensure quality alignment
- Contributed to automation script development and maintenance for regression stability

- Built and managed test environments and servers, ensuring dependable QA infrastructure
- Reduced production defects by 6% through improved test coverage and optimized defect management
- Streamlined QA processes and documentation, increasing team productivity by 5% and improving knowledge retention

Technical Assistant (Part Time) – University of Houston

Aug 2012 - May 2013, Houston, Texas, USA

Collaborated with professors and students from various academic departments and provided technical assistance.

- Mentored and assisted undergraduate students in their web development project assignments
- Designed, developed and maintained academic websites for various departments in the university

Business System Analyst – Accenture

Feb 2007 - Jun 2011, Bengaluru, Karnataka, India

Worked on multiple high-impact projects for leading global clients in travel, tourism, hospitality and banking, ensuring high-quality delivery for B2B and B2C applications.

- Analyzed and translated business requirements into functional requirements, workflows and use cases
- Collaborated with stakeholders and engineers to clarify requirements and expected system behavior
- Documented functional specifications and acceptance criteria to guide development and testing
- Supported UAT and requirement validation to ensure features met business needs before release

Training/Certificates

- *Product Owner Certification & Exam Prep + Scrum Master & AI (Online)* - Udemy
- *Digital Product Management (Online)* - Darden School Of Business, University of Virginia

Education

- *MS in Computer Science* - University of Houston, Clear Lake, Houston, Texas, USA
- *BTECH in Computer Science and Engineering* - West Bengal University of Technology, Kolkata, India
